

# GUIDE TO BUYING CRYPTO

USING PAYPAL  
TO BUY  
USDT-SOL

## PRE-REQUISITE CHECKLIST

- ☐ Do you have a US based PayPal account?

Note: To take advantage of this crypto strategy you **MUST** have an existing PayPal account or be able to make one. This strategy works only in the United States as of September 2024 when this version was written. You will also have to verify your account for crypto purchases.

- ☐ Are you crypto verified on PayPal?

If you need to do so, go here:

<https://www.paypal.com/policydashboard/process/compliance/cip>

- ☐ Do you have Exodus Wallet on mobile?

If not, please download and install one from your smartphone platform of choice. Please take the time to do your research on safe crypto wallet handling practices before proceeding with any kind of transaction.

**(NOTE: THIS DOES NOT WORK ON DESKTOP VERSIONS OF EXODUS)**

- ☐ Do you have SOL for gas fees? Gas fees are the small amount of native token needed to process a transaction on that network.

Because PYUSD is on Solana, it will require SOL gas fees to swap.

If you need SOL for gas fees, **keep following this guide to page 1.**

**IF YOU ALREADY HAVE SOL – SKIP TO PAGE 15**

**DISCLAIMER:**

This information is not financial advice. It is intended for informational purposes only. Any decisions you make are at your own risk, and we are not liable for any losses or damages. Always do your own research.

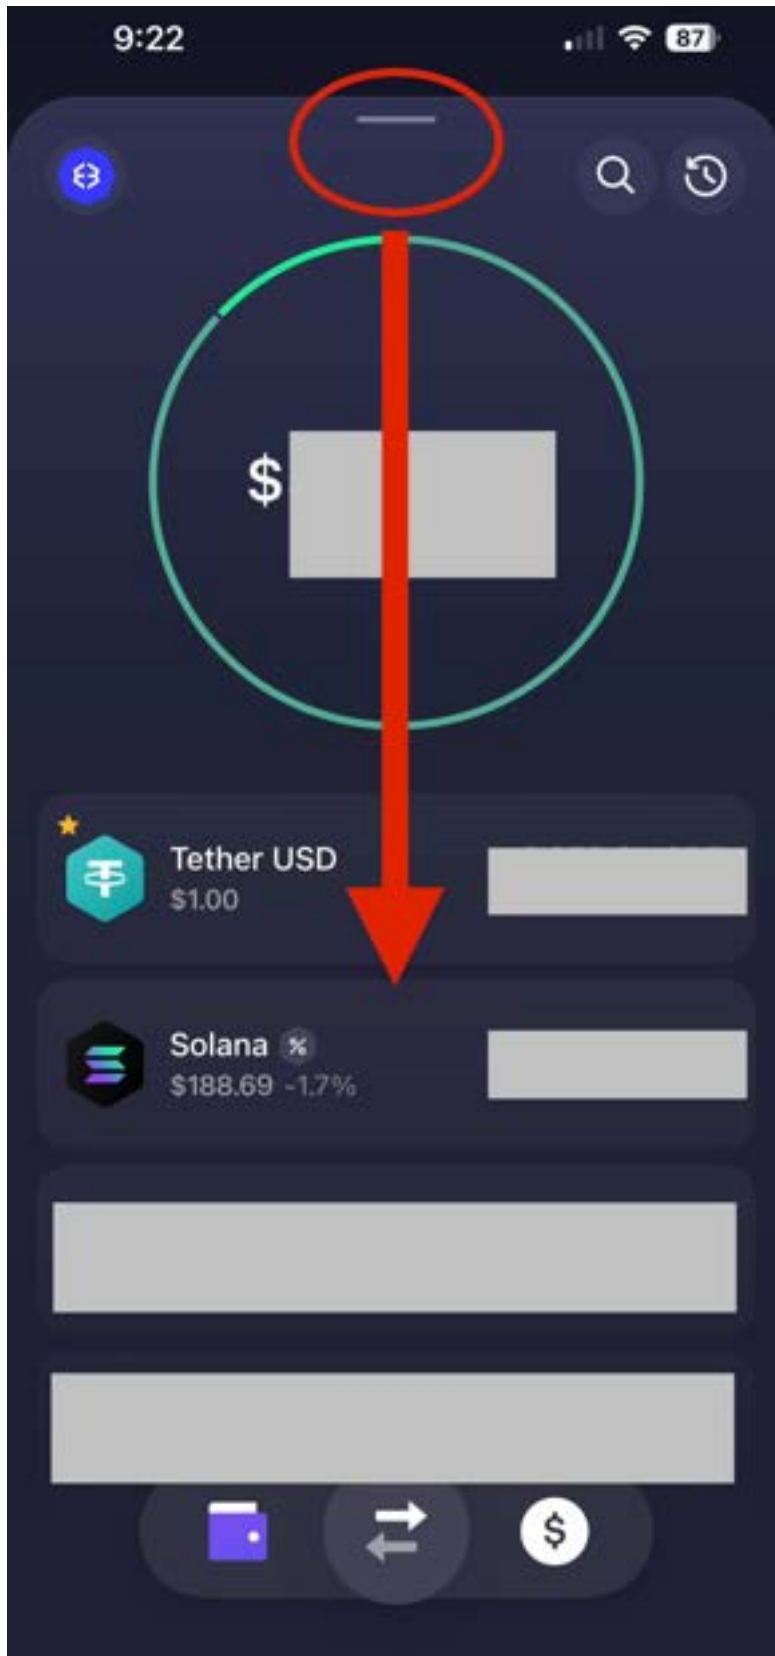

\*there may be swap fees of around \$.20 and purchase fees of around \$.15 for \$5 SOL.

Different SOL onramp services may incur slightly higher purchase fees

# BUYING SOL GUIDE

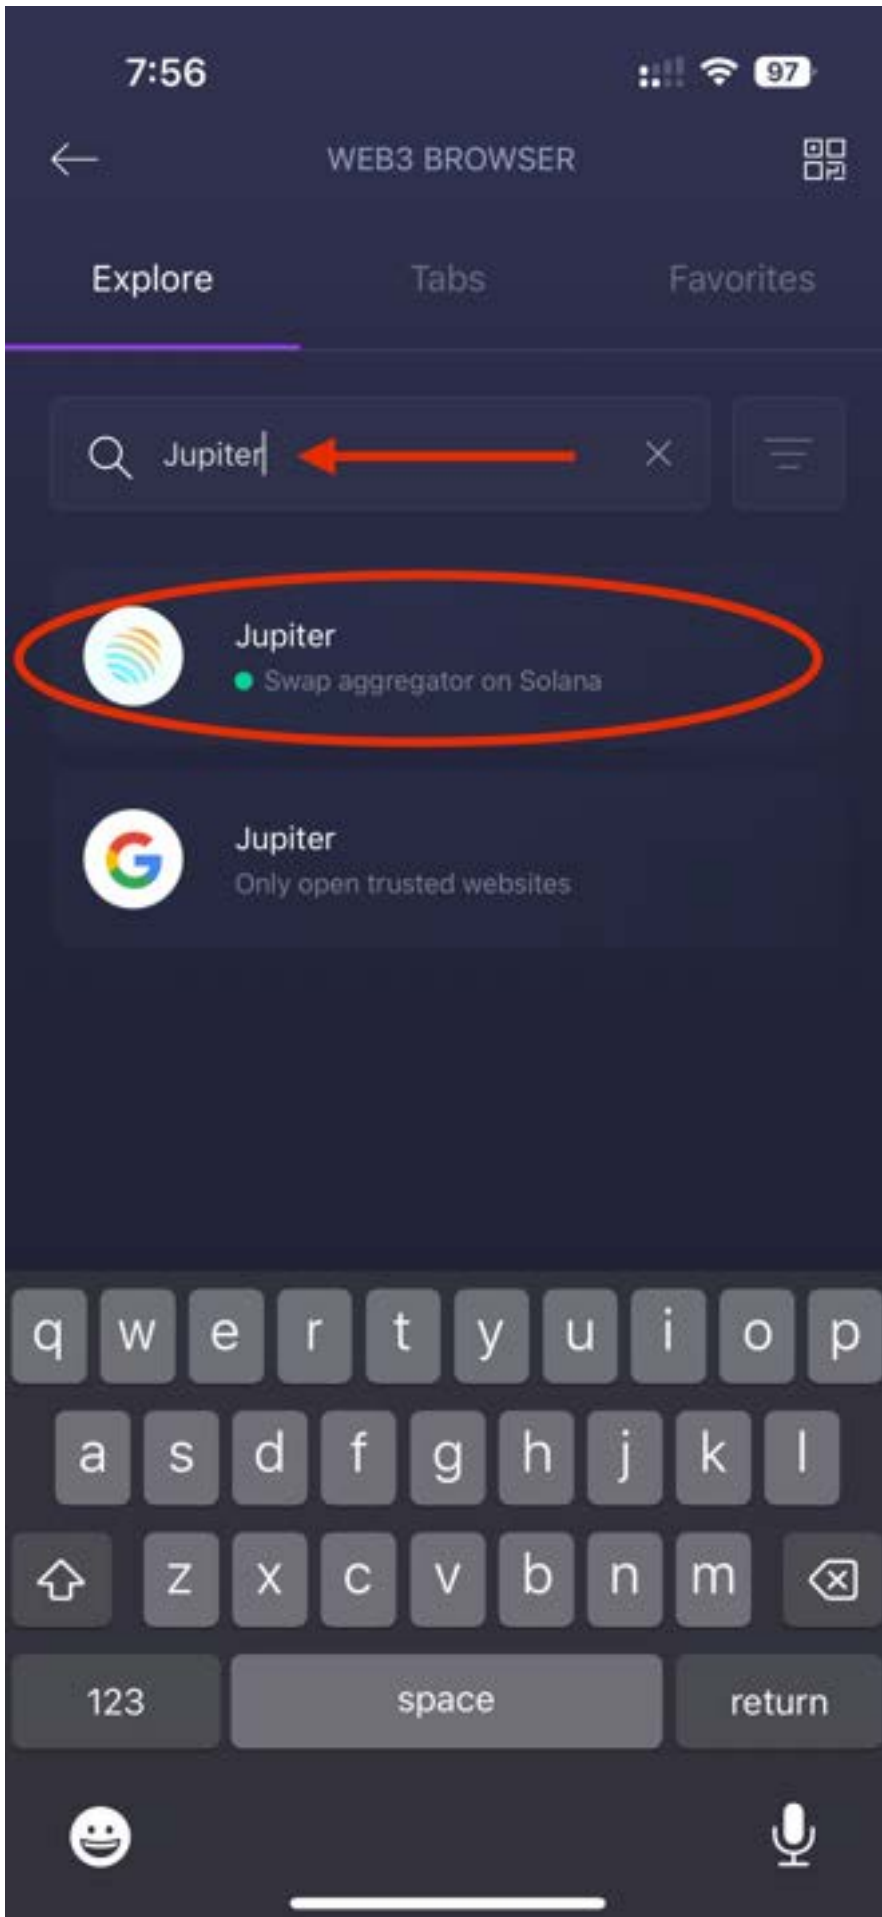

At the portfolio screen, swipe the portfolio tab down

On the Exodus  
Profile screen,  
select Web3

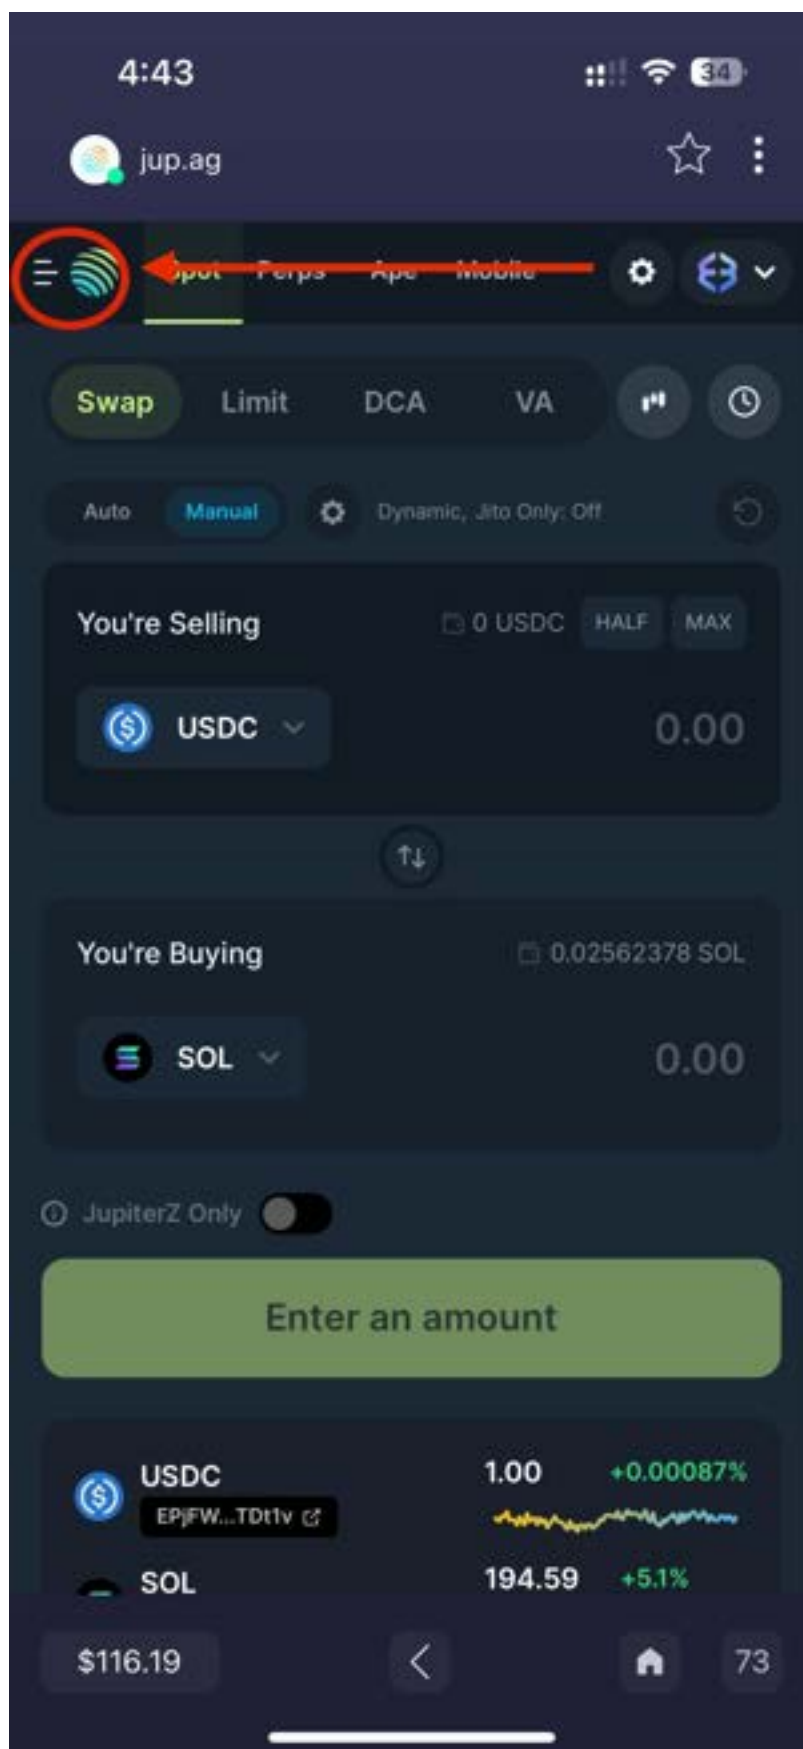

created by  
**PeptideUsername**  
**purplegoldyeezus**

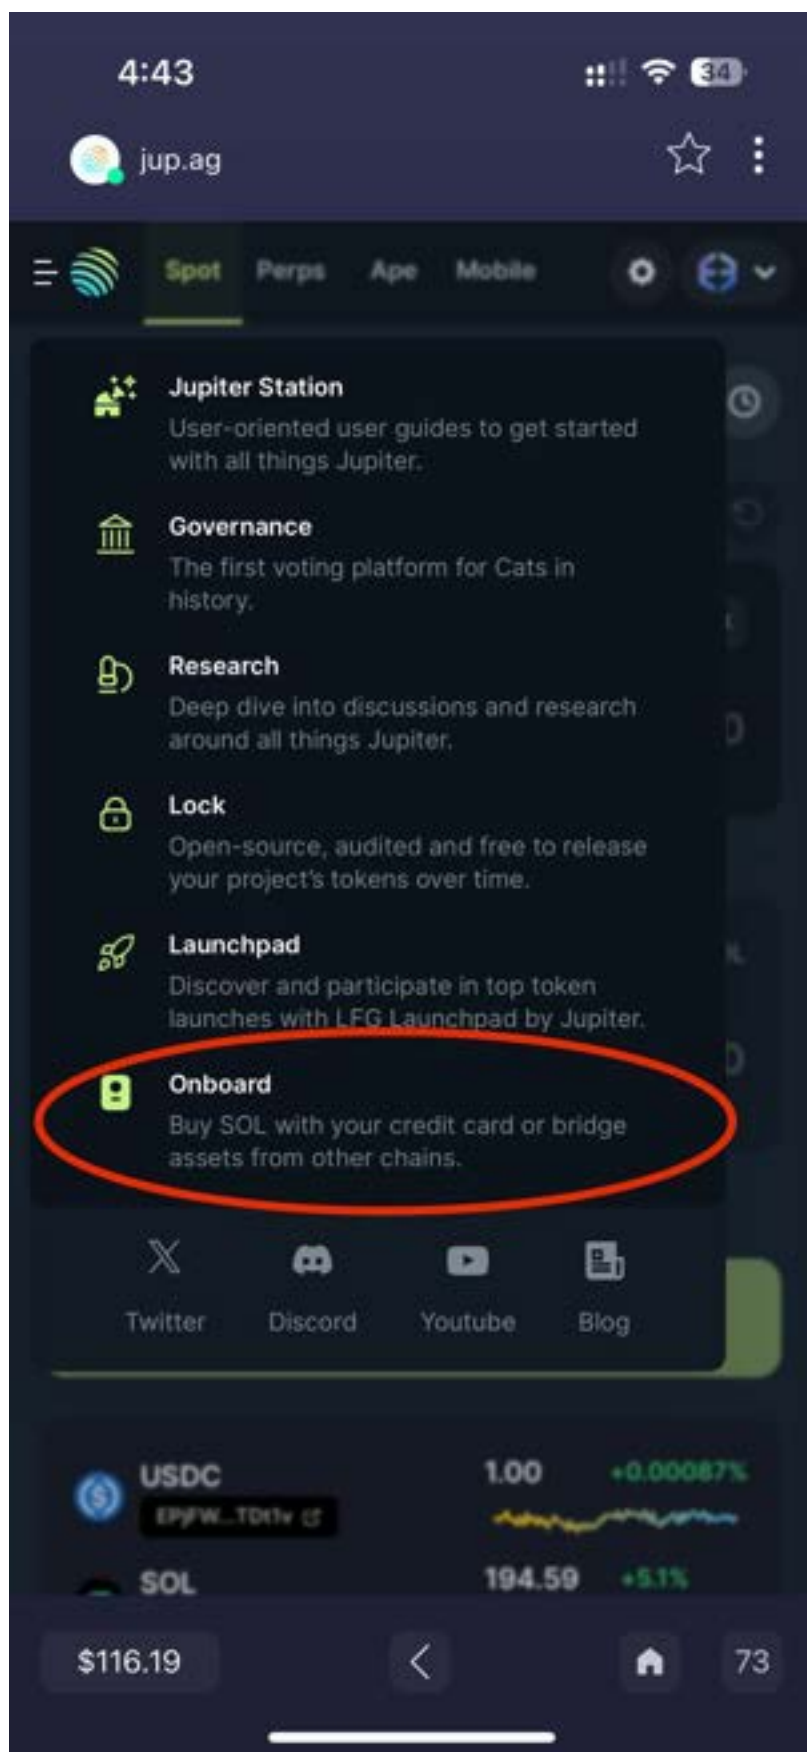

In the Web3 browser, type “Jupiter” and select it from the list

In the Jupiter landing page, select the Menu in the top left corner

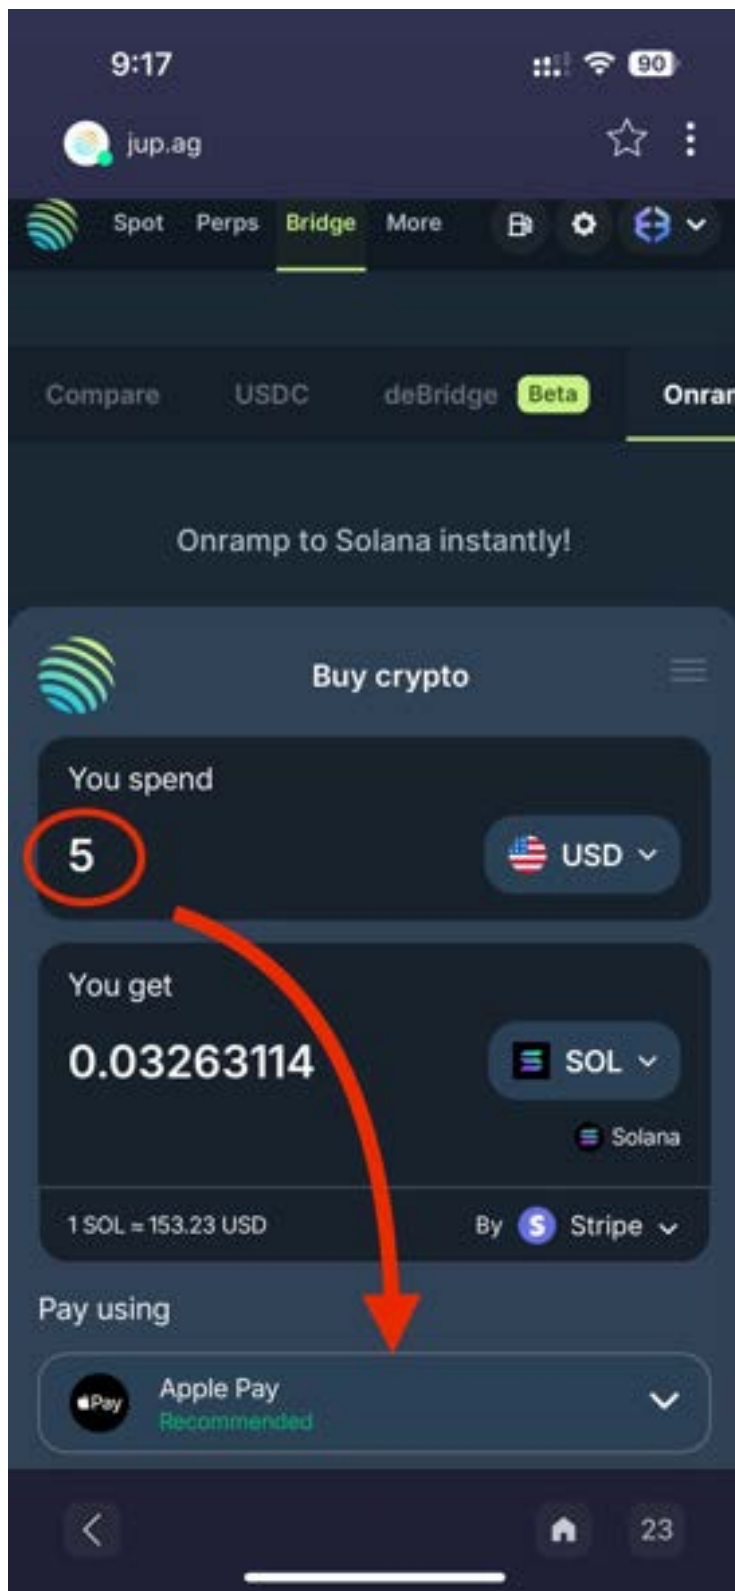

created by  
PeptideUsername  
purplegoldyezus

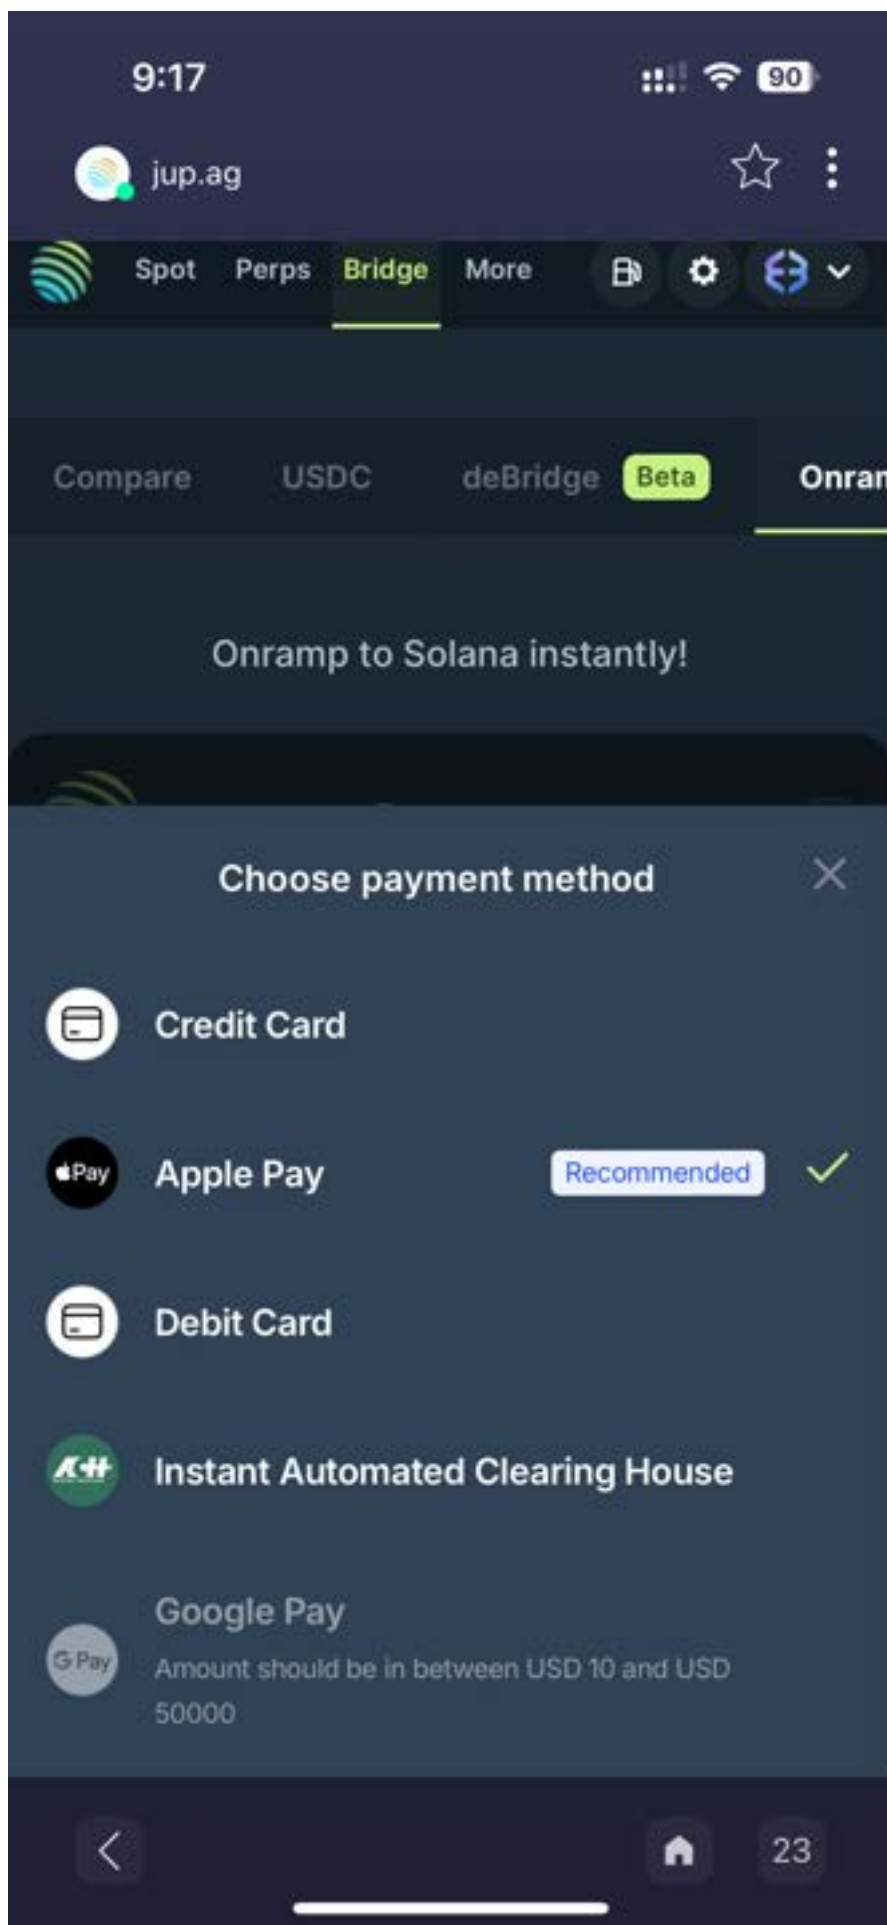

Select  
“Onboard”

Change the amount to \$5 (or the amount you prefer)

Then choose the payment options

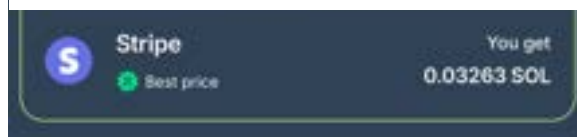

Choose the payment option that suits your needs.

**\*DISCLAIMER\***

I have not tried every method and cannot guarantee success with your bank/card issuer/choice of onramp service. If one doesn't work, try a different onramp service. Stripe is the cheapest preferred but if that doesn't work, you can increase the SOL purchase from \$5 to \$10 and other service options will appear.

The default Onramp for a low amount like \$5 is Stripe.

No ID upload required, but you will be required to verify yourself with PII.

**purplegoldyeezus**

When you have chosen your payment method, onramp service, and have the correct amount, swipe down and select “Buy SOL”

**NOTE:**

Some Android users may experience trouble at this step. If you experience this, the same steps can be taken through your phone's web browser at <https://jup.ag> and use walletconnect to connect your wallet address

# BUYING USDT VIA PAYPAL GUIDE

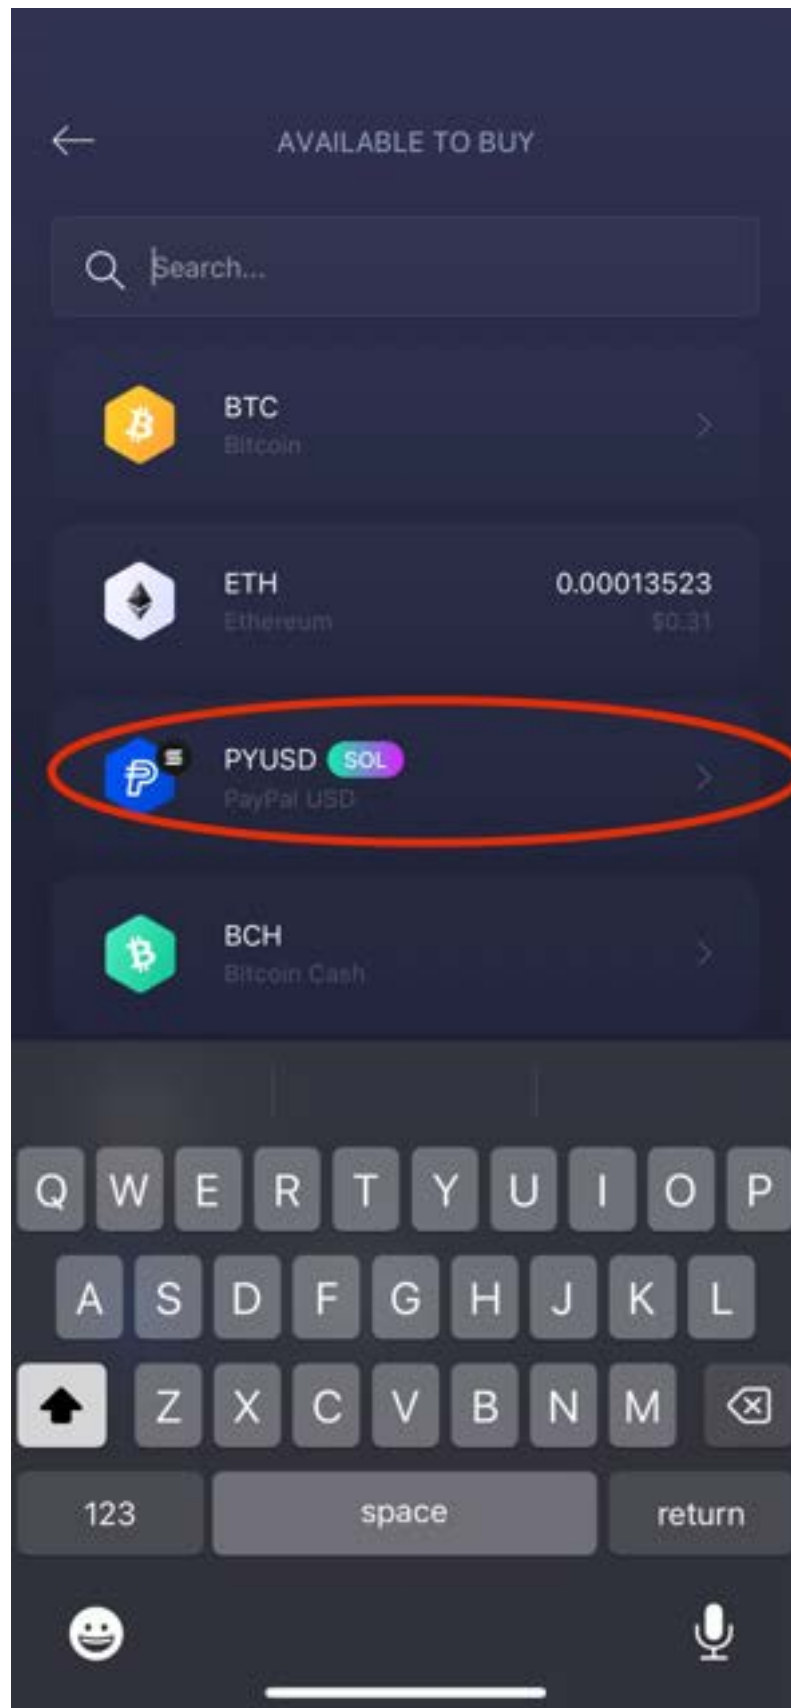

From the Exodus Portfolio screen, click the Buy button

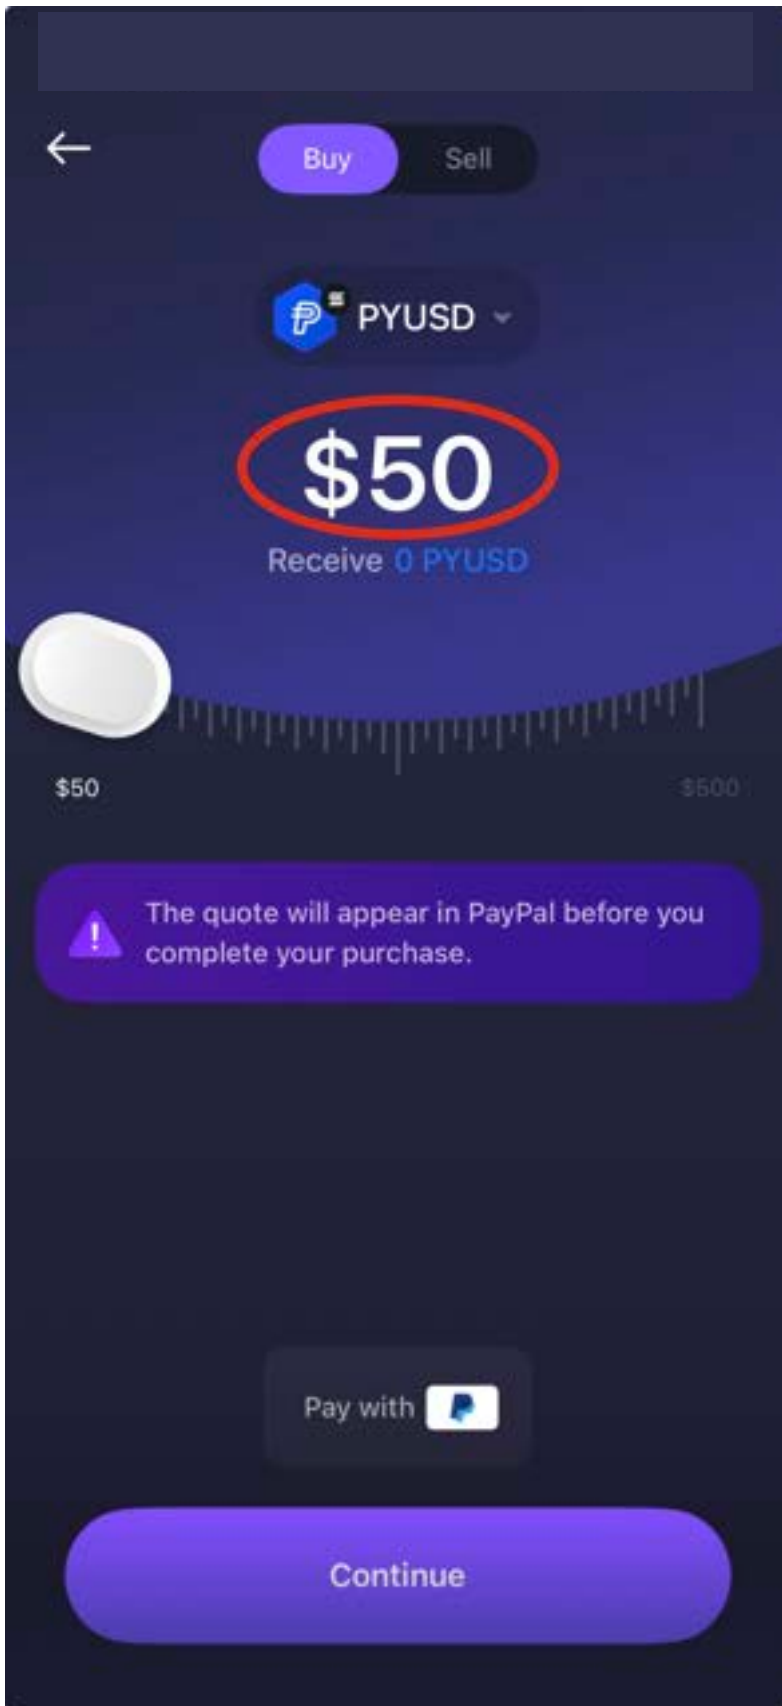

created by  
**PeptideUsername**  
**purplegoldyeezus**

Select the dropdown menu that says “BTC”

Select PYUSD

Select the amount  
you want.  
Then press  
“Continue”

\*\*\*REMINDER\*\*\*

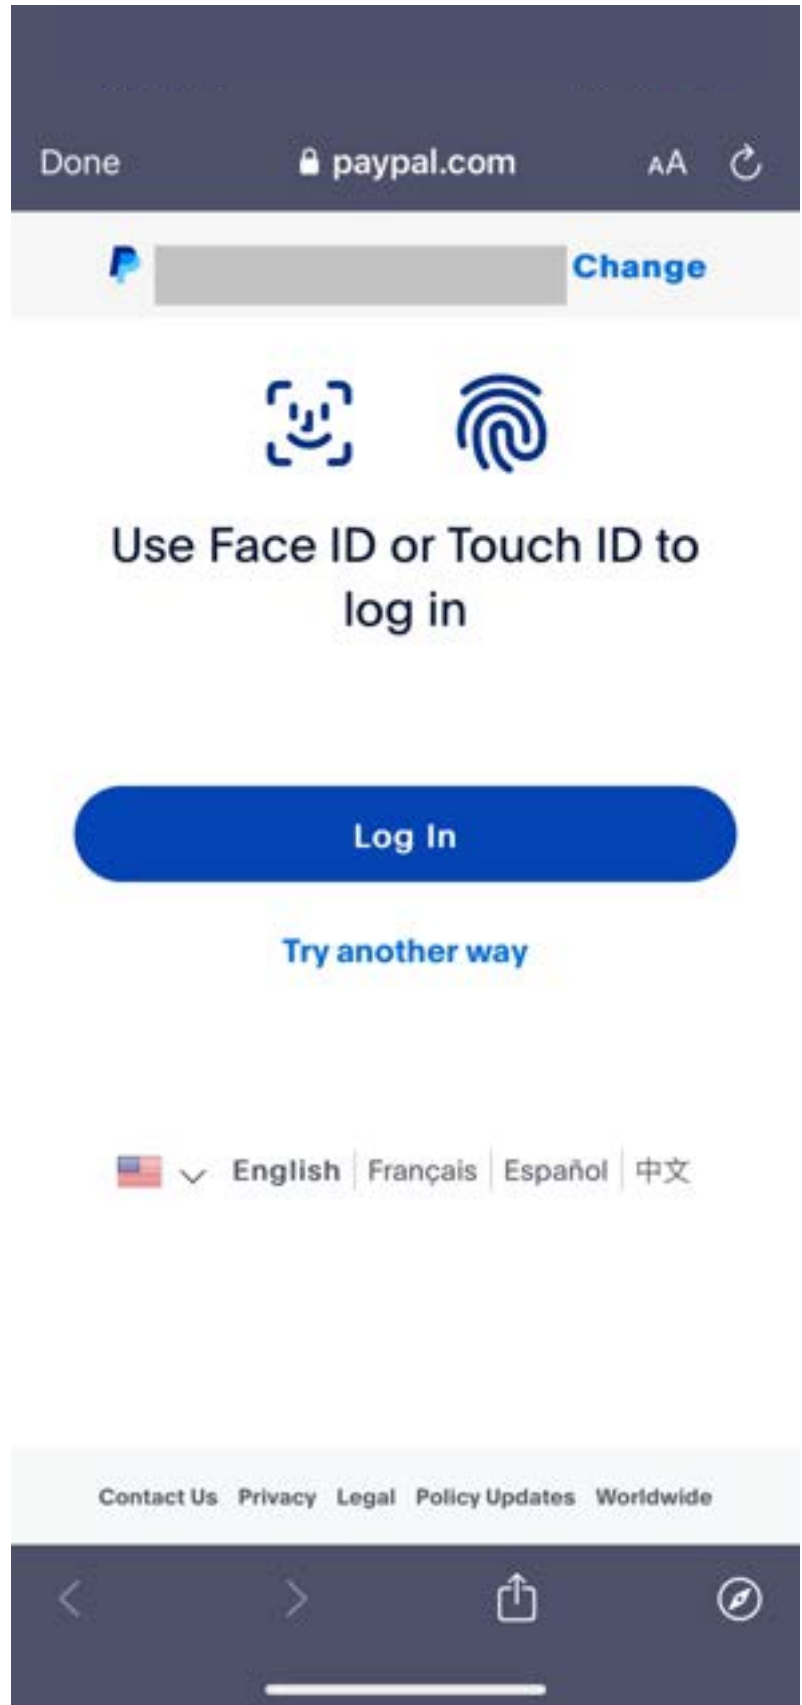

It's possible to buy  
just \$5 to try out this  
strategy if you're  
worried about first  
trying with larger  
amounts!

## Log into PayPal

Having trouble completing the purchase because of your bank?

You can also add cash to your PayPal account by visiting a participating retailer. Use the PayPal app to get a barcode, take it to the store, and pay with cash. (There may be a small fee) The money will show up in your PayPal balance right away, and you can finish the rest of the guide. Once funded, make sure the payment method is “PayPal Account Balance” For more information, visit:

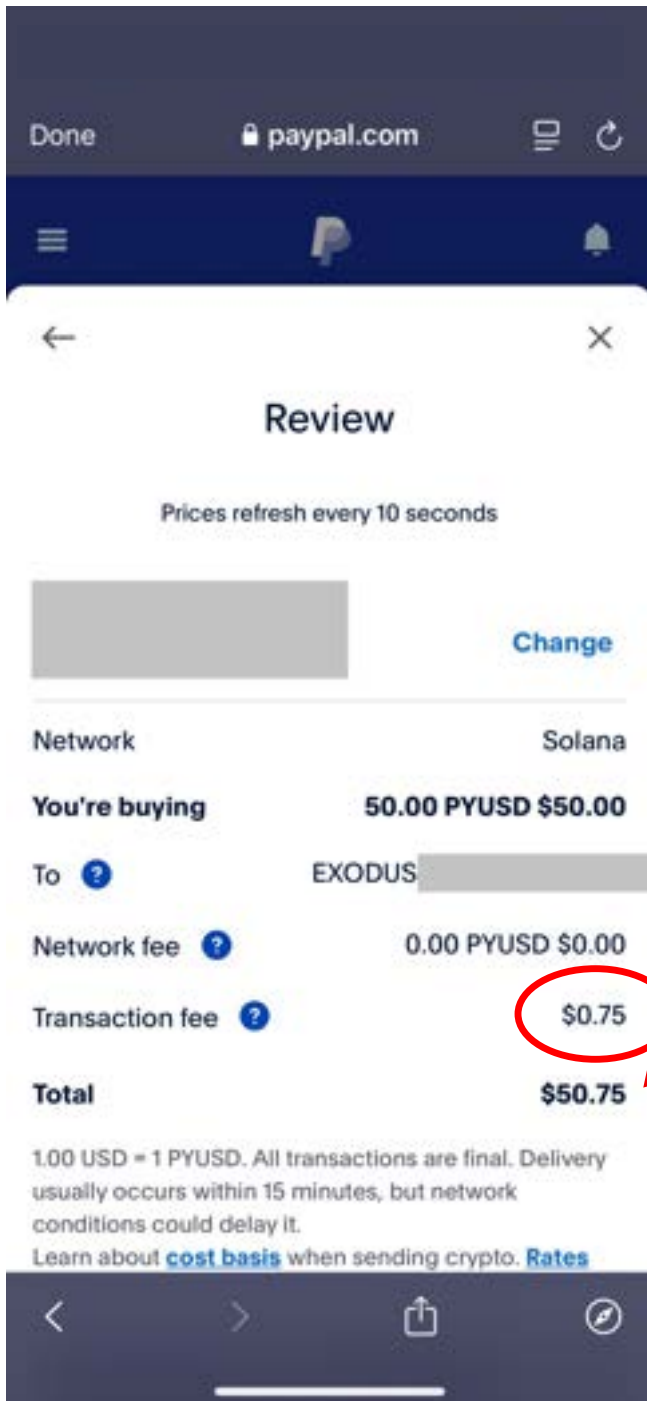

<https://www.paypal.com/us/digital-wallet/manage-money/add-cash>

**purplegoldyeezus**

Complete your purchase through PayPal

Note: When using a checking account to buy crypto via PayPal, your funds may be held for up to 7 days or more.

Use a debit card to avoid this delay!

1.5% transaction fee

PayPal has started charging a convenience fee for purchases made through Exodus Wallet.

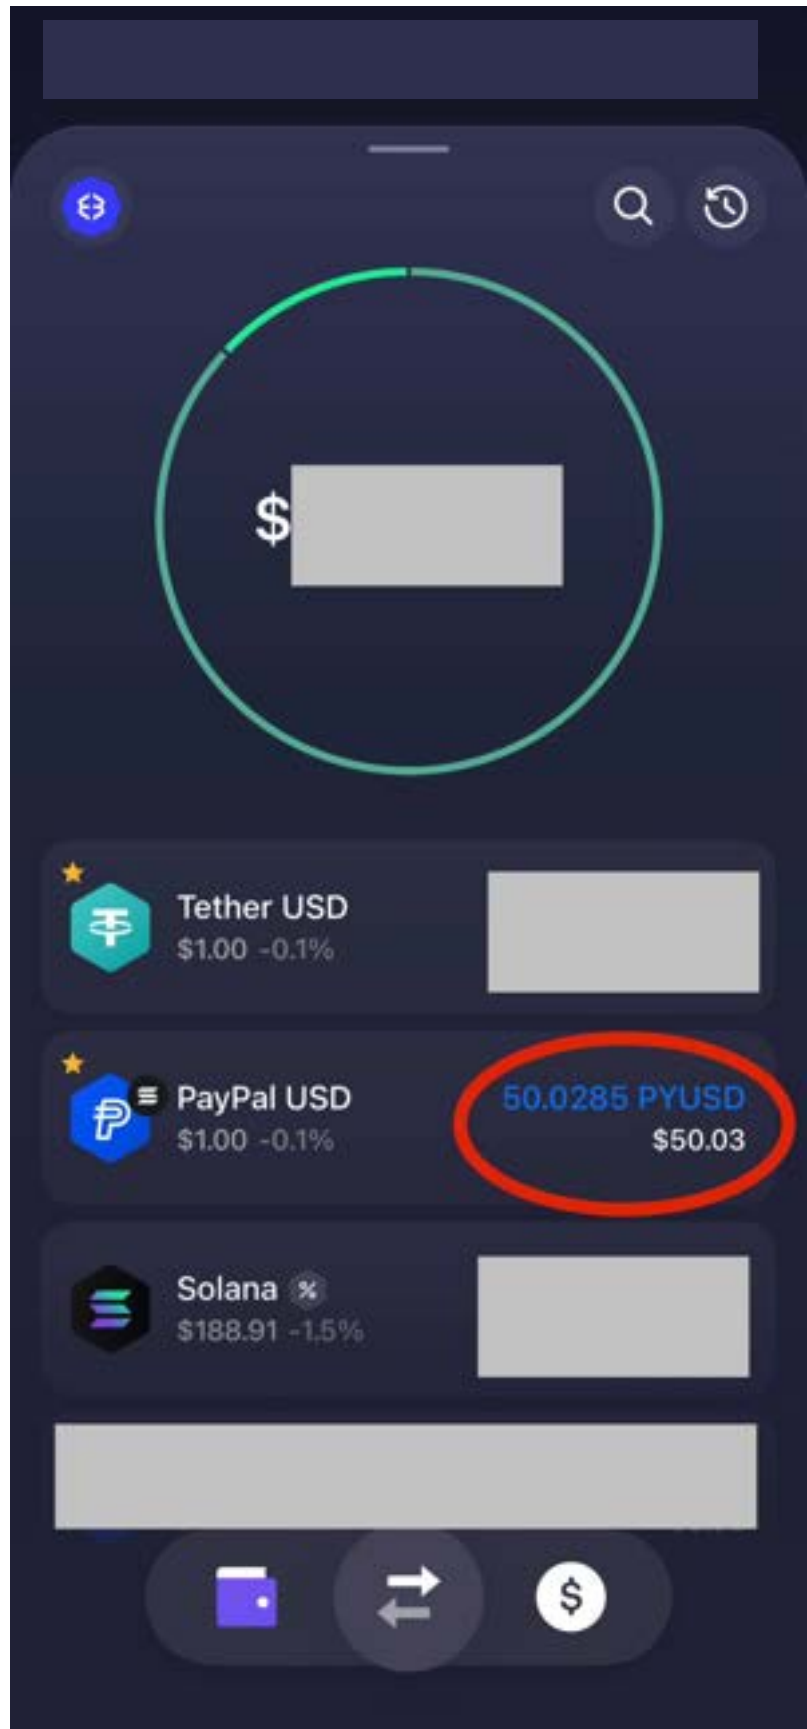

**THE WORKAROUND:**

1. Go to PayPal.com and buy PYUSD on the website.
2. Find your PYUSD Exodus Wallet address.
3. On PayPal.com, send your newly purchased PYUSD to the Exodus wallet address. This will result in no transaction or network fees.
4. Continue the rest of this guide!

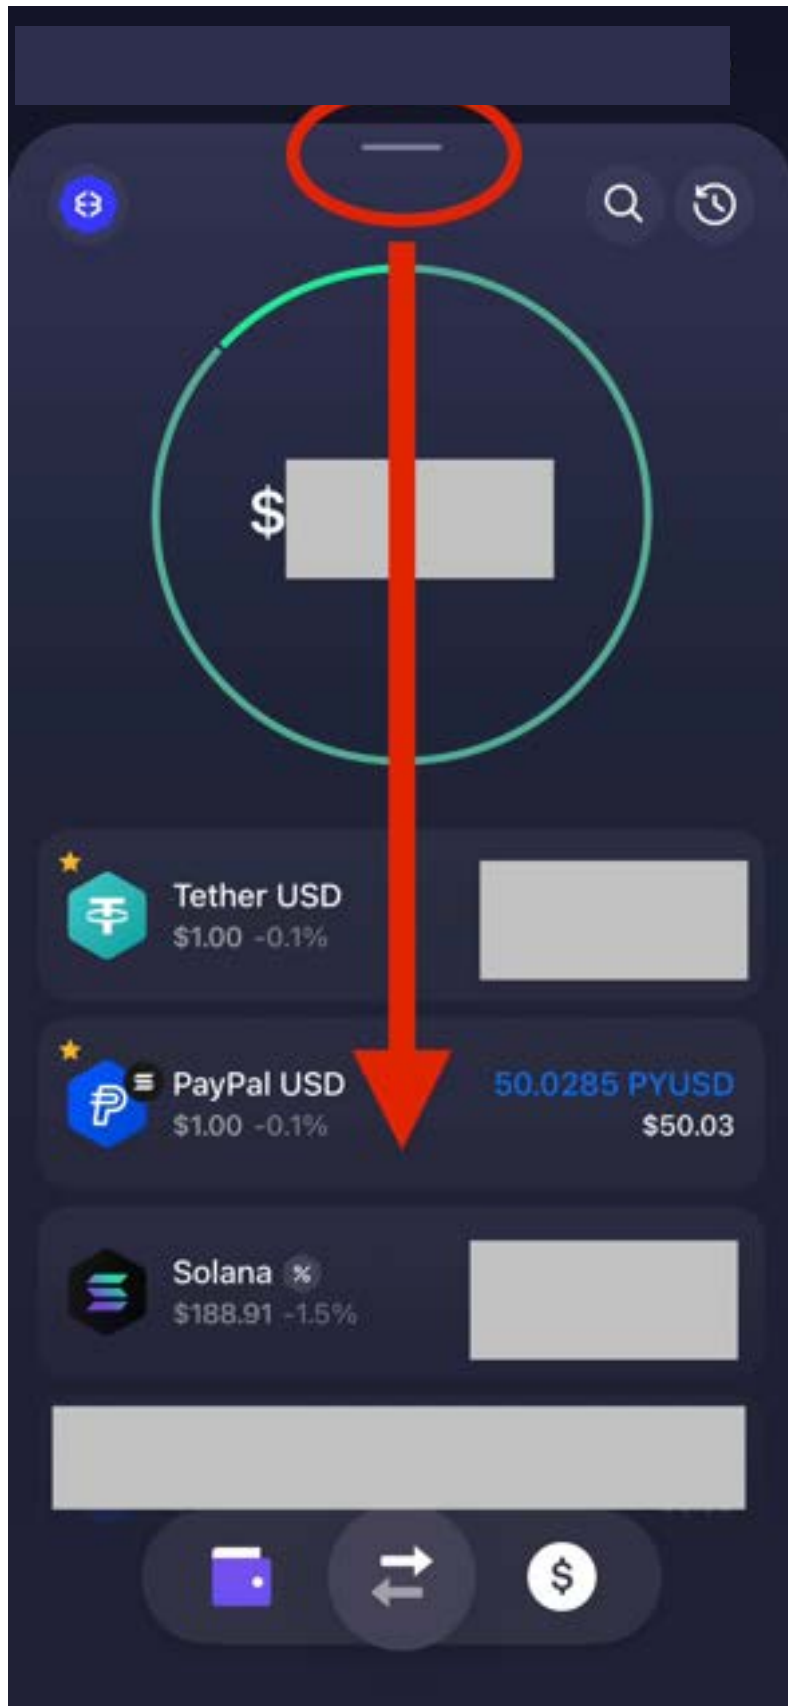

created by

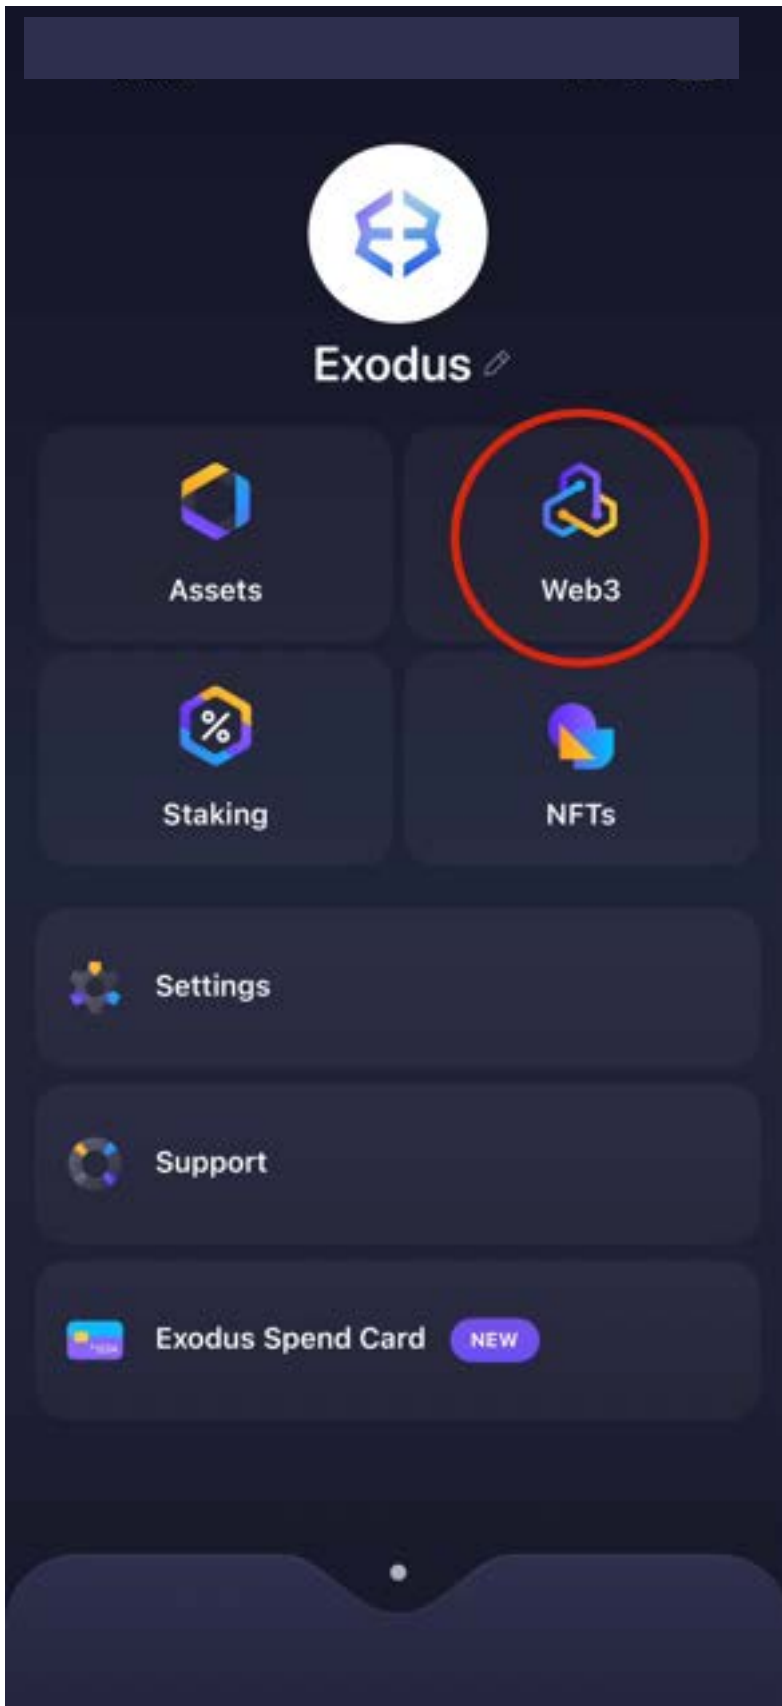

**PeptideUsername**  
**purplegoldyezus**

Back at the portfolio screen, verify your PYUSD balance

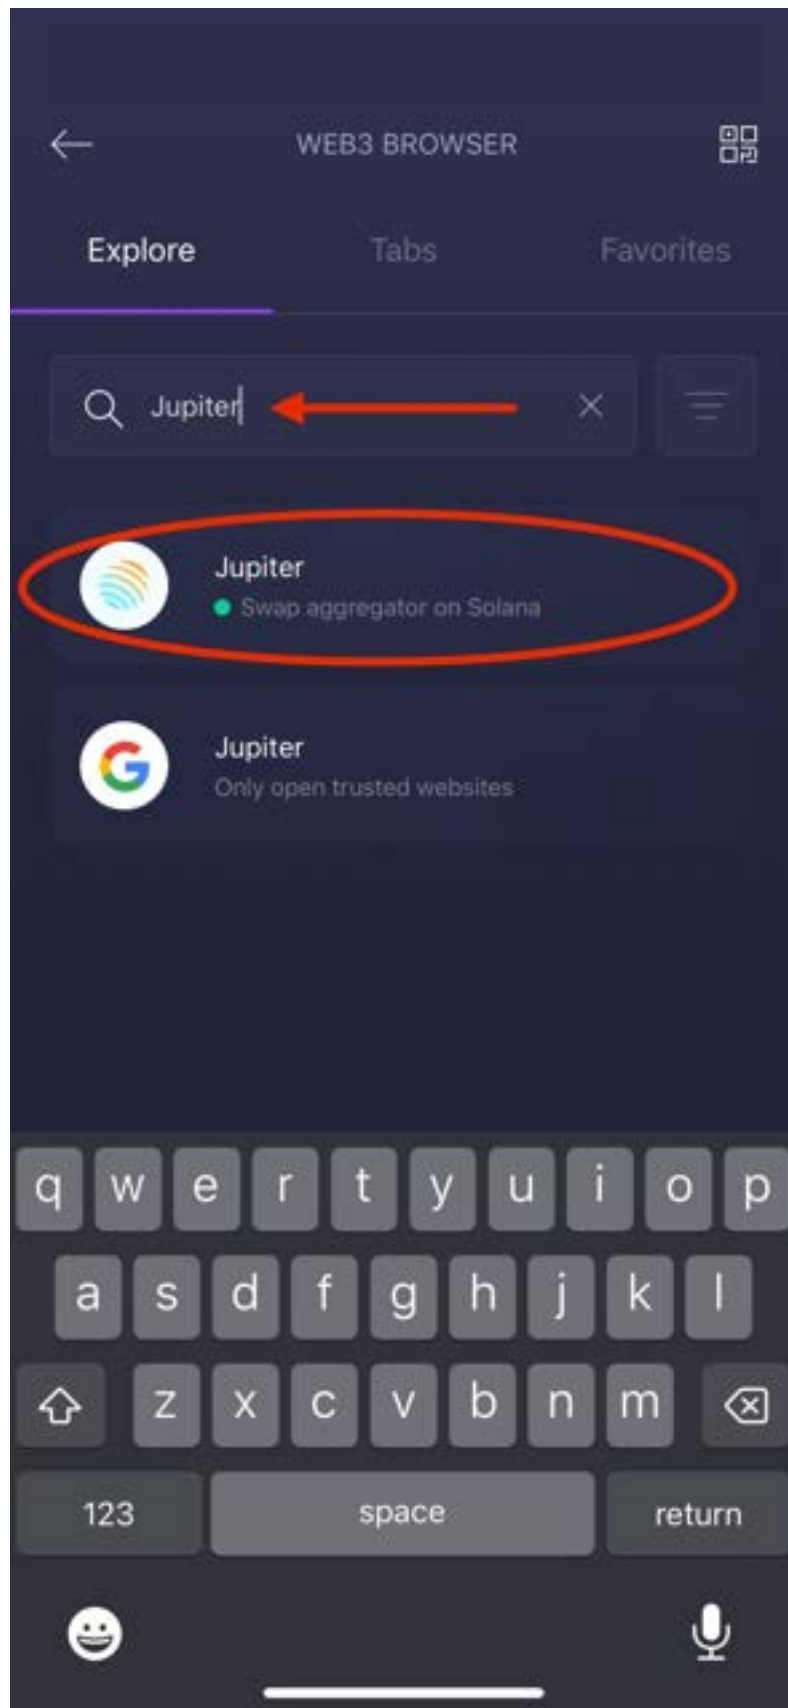

Back at the portfolio screen, swipe the portfolio tab down

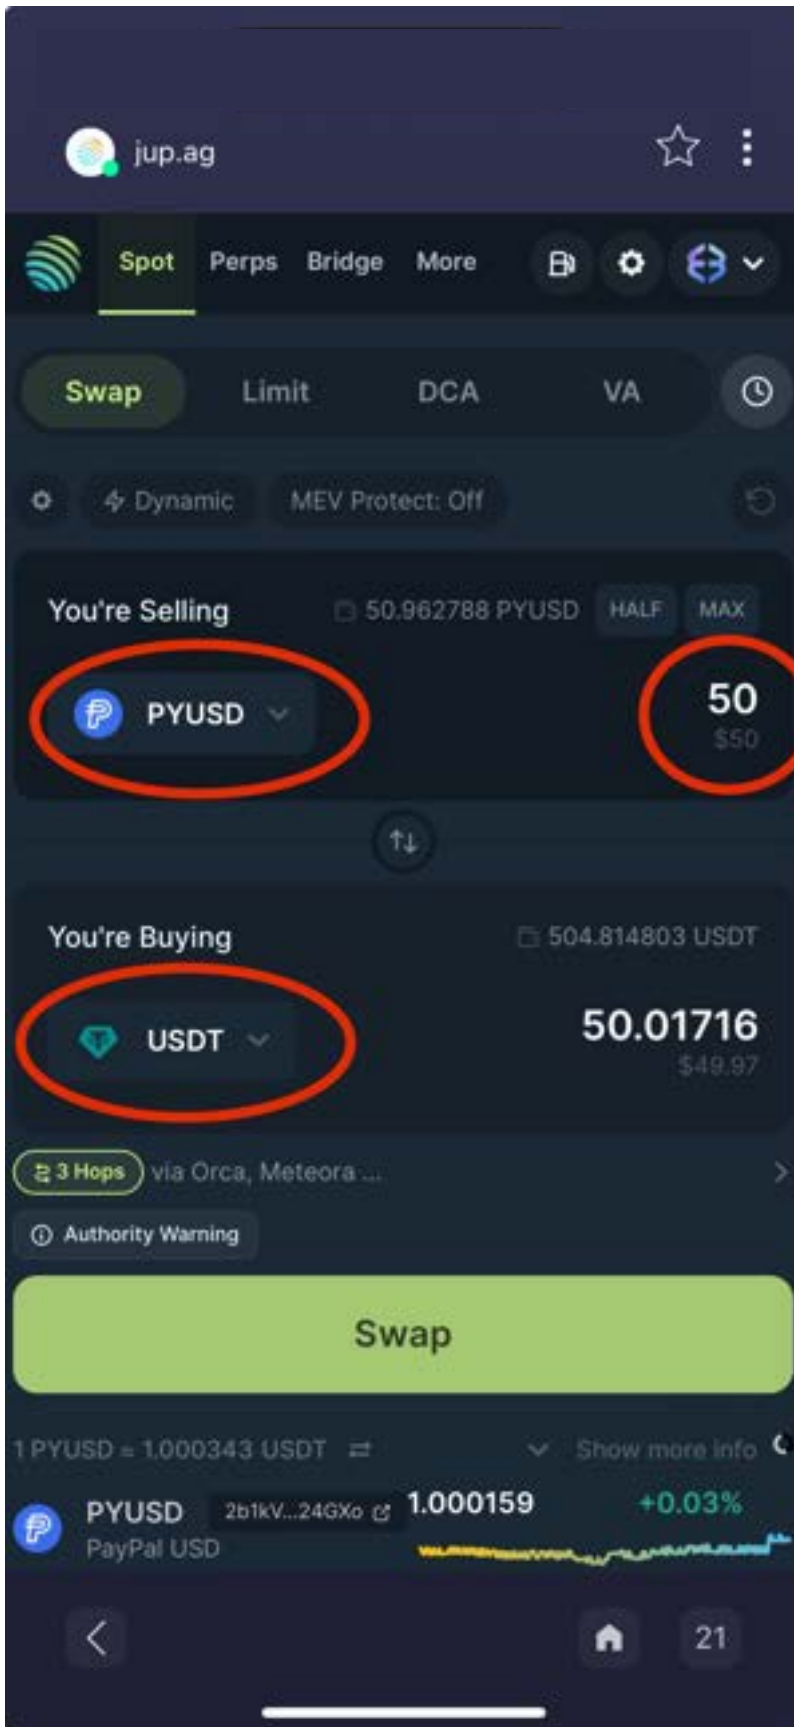

In the Exodus  
Profile  
dashboard,  
select Web3

Type “Jupiter” in the box, then select it from the list.

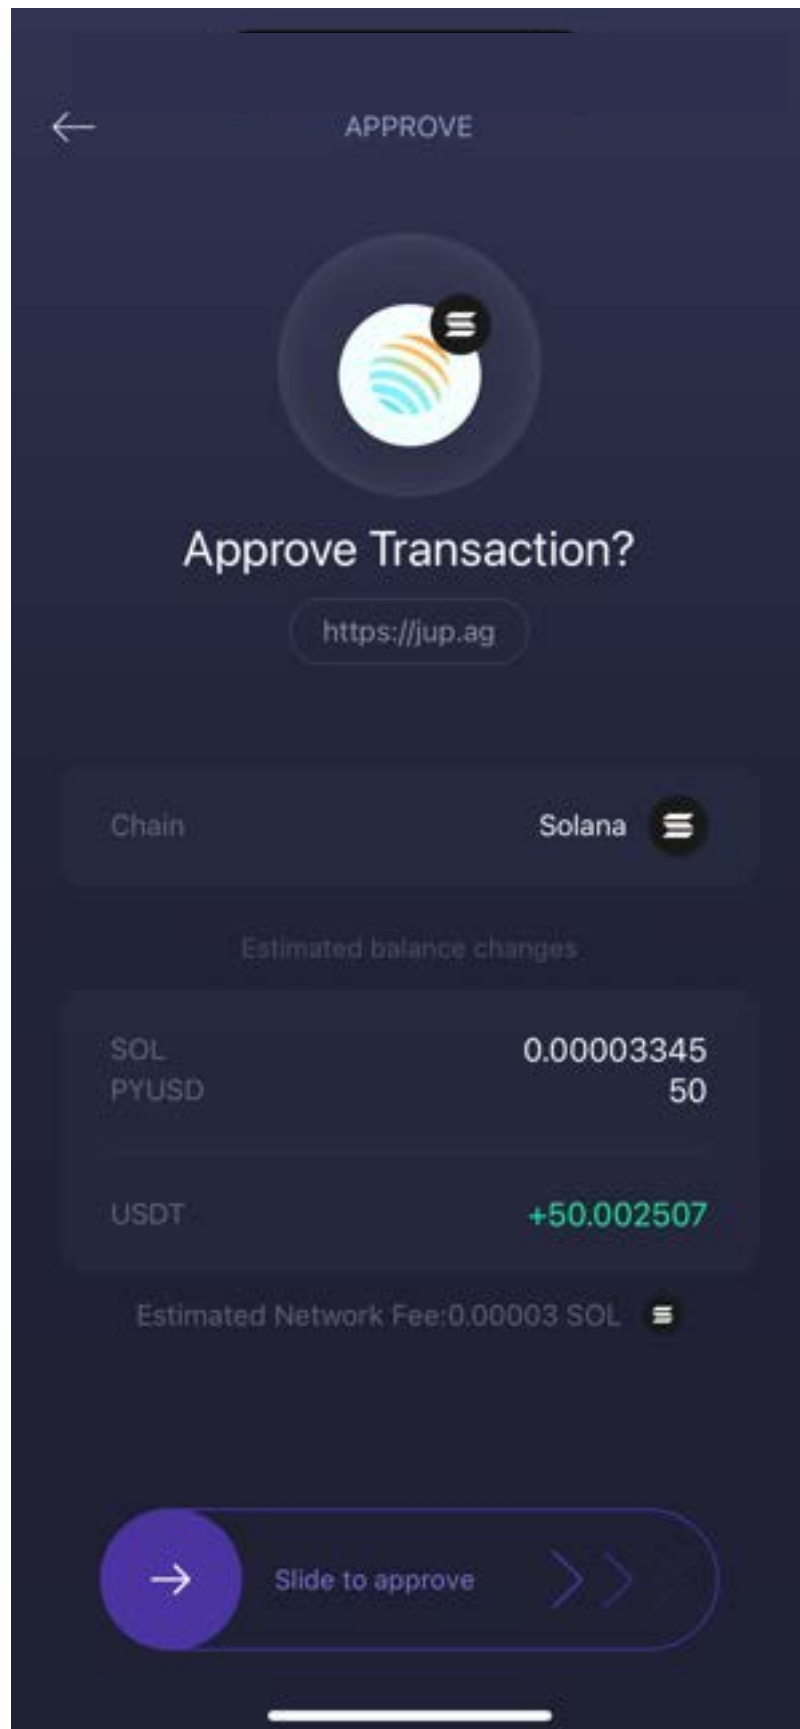

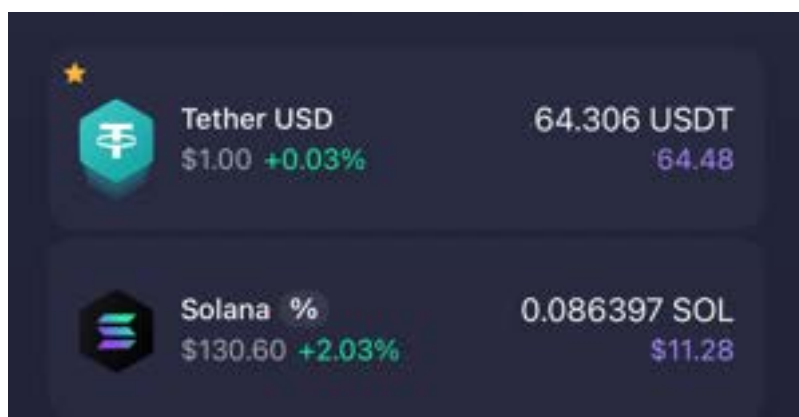

On the Jupiter interface, change “You’re Selling” to PYUSD, and set “You’re Buying” to “USDT”

Enter the amount you want to convert to USDT, then press “Swap”

Review and  
approve

Verify balances  
of your wallets.

You're done!
